GS-LUX

Stop end ZP-LUX finishing element of top ridge cap GS-LUX

New
in offer

The GS-LUX Ridge end cap at the ridge ends, ensures aesthetic and functional roof protection, maintaining material homogeneity.

Features and references

- Prevents precipitation and pollution from getting under the ridge tiles.
- Perfectly fitted, factory-made GS-LUX Ridge end cap.
- Made of one element in the deep drawing process, no joints.
- The shape adapted to the GS-LUX ridge tile eliminates the need to make elements on site by hand.
- Quick and easy assembly thanks to factory-made mounting holes, using farmer screws 4,8x19 or coated rivets.
- High quality and precision of workmanship, guarantees a perfect, durable and exceptionally aesthetic roof finish.
- Guarantee of compatibility and color consistency with GS-LUX Ridge tile and roofing.
- This element is an integral part of other modular roof flashings.
- Guarantee of originality (signed with the company logo).
