**Water resistance, permeability of water, air and vapor** – Products that don't have perforations (as damages) are waterproof and impermeable to steam and air.

**Change of dimensions** – thermal expansion should be taken into account where such change may affect the use of product, correspondent steel thermal expansion coefficient  $12 \times 10^{-6} \text{ K}^{-1}$  should be taken into account.

Dimension tolerances for roof products are described in standard PN-EN 508-1:2010
